A survey of developers' experiences on reusing code snippets from Stack Overflow

Dear developer,

We are researchers in the Software Systems Engineering Group at University College London, UK. We are studying problems caused by outdated and license-violating code snippets on Stack Overflow. We have designed a survey to understand these problems and would be grateful if you would complete it.

The survey is completely anonymous and has 15 questions and should only take about 5-7 minutes to complete. We hope that you will complete the entire form but if you do not wish to continue, you can just guit the session and your input will be discarded.

The survey results will be used only for academic research purposes and we plan to release the results to Stack Overflow and in the form of academic papers and presentations.

This research project has been approved by the designated ethics officer in the Computer Science Department at UCL.

If you have any question, please feel free to contact me.
