Queries to the Author

Q1. Please confirm or add details for any funding or financial support for the research of this article.

There is no funding or financial support for this article.

Q2. There was a discrepancy in bibliography in the PDF and the source file. We have followed the source file.

It seems like the order of bibliography in the proof version is sorted based on the order of appearance in the paper, instead of by the authors' last names as in the PDF. This is fine by us.

Q3. Please provide text cite for Table 21.

Please add the following text into the beginning of line 1216

"As shown in Table 21, we found 102 cloned candidates, …"

Q4. Please provide complete bibliography details for ref [62].

The current details of ref[62] contains all the information that we can extract about the document. You can find the PDF of ref[62] attached with this submission.

Q5. Please provide page-range in ref [76].

We could not find the page range for the paper ref[76]. Can it be omitted? Moreover, there is a mistake in the proceedings name. The paper is actually published at *the Third International Workshop on Detection of Software Clones (IWSC '09)*, 2009.

Additional issue:

We have found that our biographies are also modified. However, we prefer the original version that we provided. Could you please revert it back?
